GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

OWNER ASSIGNMENT OF STATEMENT OF WATER DIVERSION AND USE
NO. S009614 FOR DIVERSION FROM PATTISON CREEK, TRINITY COUNTY

Dear Ms. Harris:

On November 16, 2004, the State Water Resources Control Board, Division of Water Rights (Division) received a Notice of Assignment for Statement of Water Diversion and Use changing the ownership of the riparian claim from Robert E. Girsback to Beverly Jean Harris. Also attached was a copy of the Grant Deed, showing the transfer of the property.

Division staff has updated the ownership information of Statement of Water Diversion and Use No. S009614 to show the following:

Statement ID:	S009614
Current Owner:	Beverly Jean Harris
Mailing Address:	P.O. Box 707 Big Bar, CA 96010-0707
Telephone:	(530) 623-1932

I have enclosed for your use a copy of the original Statement of Water Diversion and Use, and a copy of the current Supplemental Statement of Water Diversion and Use (Supplemental Statement) that the Division has on record. The submittal of a Supplemental Statement is a record of your water use. It is used by the Division to verify existing data and also gives the Division the ability to notify you of water right matters related to your riparian claim.

A Supplemental Statement will be mailed to you every three years. You should be receiving your Supplemental Statement for the years 2002, 2003, and 2004, within the next month. A completed Supplemental Statement for this period should be submitted on or before July 1. There is no fee for filing a Supplemental Statement.

Should you have questions regarding this matter, please call me at (916) 341-5315.

Sincerely,

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
